Week 3

This week I used AI to do research about different countries and what they have to offer to immigrants. It was very interesting to see the differences between countries. I did not use AI to complete any of the exercises this week. Here are my AI chat links.

I also had some questions about the US military and some of the benefits they could offer to students. I enjoyed understanding exactly how beneficial it could be. Most of the answers given by AI were useful to my research and great knowledge to have.
