

### Week03 AI Journal Entry

This week, I mostly used AI for prompt engineering. My English course had a chapter about prompt optimization and how to get the most out of an AI using context and clear instructions. I took the opportunity to give Claude a fair try and observe how it differs from ChatGPT.

Here are my AI chat links for Claude:

<https://claude.ai/share/48a5e9a4-2b12-4db0-9ba9-adac7dada6ea>

It was very enlightening; after learning more about prompt engineering, I feel like I haven't been using AI to its full potential until now. Trying out Claude was also interesting. I find it cool how it uses information from previous chats as well as the projects feature that allows you to create different chats regarding the same overall project or topic and group them together for future use. As for ChatGPT, I haven't used it much this week since I really wanted to see how I felt after using Claude for a bit. Overall, I would recommend that anyone who hasn't read about prompt engineering do so during their free time.
